Researcher: ‘We Made a Big Mistake’ on COVID-19 Vaccine

June 15, 2021

By Dr. Joseph Mercola

- **Canadian immunologist and vaccine researcher Byram Bridle, Ph.D., has gained access to Pfizer’s biodistribution study from the Japanese regulatory agency. The research, previously unseen, demonstrates a huge problem with all COVID-19 vaccines**
- **The assumption that vaccine developers have been working with is that the mRNA in the vaccines would primarily remain in and around the vaccination site. Pfizer’s data, however, show the mRNA and subsequent spike protein are widely distributed in the body within hours**
- **This is a serious problem, as the spike protein is a toxin shown to cause cardiovascular and neurological damage. It also has reproductive toxicity, and Pfizer’s biodistribution data show it accumulates in women’s ovaries**
- **Once in your blood circulation, the spike protein binds to platelet receptors and the cells that line your blood vessels. When that happens, it can cause platelets to clump together, resulting in blood clots, and/or cause abnormal bleeding**
- **Pfizer documents submitted to the European Medicines Agency also show the company failed to follow industry-standard quality management practices during preclinical toxicology studies and that key studies did not meet good laboratory practice standards**

The more we learn about the COVID-19 vaccines, the worse they look. In a recent interview with Alex Pierson (above), Canadian immunologist and vaccine researcher Byram Bridle, Ph.D., dropped a shocking truth bomb that immediately went viral, despite being censored by Google.

It also was featured in a “fact” check by The Poynter Institute’s Politifact,[2] which pronounced Bridle’s findings as “false” after interviewing Dr. Drew Weissman,[3] a UPenn scientist who is credited with helping to create the technology that enables the COVID mRNA vaccines to work. But, as you can see below, unlike Bridle, Politifact neglected to go beyond interviewing someone with such a huge stake in the vaccine’s success.

In 2020, Bridle was awarded a $230,000 government grant for research on COVID vaccine development. As part of that research, he and a team of international scientists requested a Freedom of Information Act (FOIA) access to Pfizer’s biodistribution study from the Japanese regulatory agency. The research,[4,5] previously unseen, demonstrates a huge problem with all COVID-19 vaccines.

> *“We made a big mistake,”* Bridle says. “*We thought the spike protein was a great target antigen; we never knew the spike protein itself was a toxin and was a pathogenic protein. So, by vaccinating people we are inadvertently inoculating them with a toxin.”*

This toxin, Bridle notes, can cause cardiovascular damage and infertility — a claim echoed by researchers such as Stephanie Seneff, Ph.D., and Judy Mikovits, Ph.D., whom I’ve interviewed about these issues.

Pfizer Omitted Industry-Standard Safety Studies

What’s more, TrialSite News reports[6] that Pfizer documents submitted to the European Medicines Agency [EMA] reveal the company “did not follow industry-standard quality management practices during preclinical toxicology studies … as key studies did not meet good laboratory practice (GLP).”

Neither reproductive toxicity nor genotoxicity (DNA mutation) studies were performed, both of which are considered critical when developing a new drug or vaccine for human use. The problems now surfacing matter greatly, as they significantly alter the risk-benefit analysis underlying the vaccines’ emergency use authorization. As reported by TrialSite News:[7]

> *“Recently, there has been speculation regarding potential safety signals associated with COVID-19 mRNA vaccines. Many different unusual, prolonged, or delayed reactions have been reported, and often these are more pronounced after the second shot.*

> *Women have reported changes in menstruation after taking mRNA vaccines. Problems with blood clotting (coagulation) — which are also common during COVID-19 disease — are also reported. In the case of the Pfizer COVID mRNA vaccine, these newly revealed documents raise additional questions about both the genotoxicity and reproductive toxicity risks of this product.*

> *Standard studies designed to assess these risks were not performed in compliance with accepted empirical research standards. Furthermore, in key studies designed to test whether the vaccine remains near the injection site or travels throughout the body, Pfizer did not even use the commercial vaccine (BNT162b2) but instead relied on a ‘surrogate’ mRNA producing the luciferase protein.*

> *These new disclosures seem to indicate that the U.S. and other governments are conducting a massive vaccination program with an incompletely characterized experimental vaccine.*

> *It is certainly understandable why the vaccine was rushed into use as an experimental product under emergency use authority, but these new findings suggest that routine quality testing issues were overlooked in the rush to authorize use.*

People are now receiving injections with an mRNA gene therapy-based vaccine, which produces the SARS-CoV-2 spike protein in their cells, and the vaccine may be also delivering the mRNA and producing spike protein in unintended organs and tissues (which may include ovaries).”

Toxic Spike Protein Enters Blood Circulation

The assumption that vaccine developers have been working with is that the mRNA in the vaccines (or DNA in the case of Johnson & Johnson and AstraZeneca’s vaccines) would primarily remain in and around the vaccination site, i.e., your deltoid muscle, with a small amount draining into local lymph nodes.[8]

Pfizer’s data, however, show this isn’t the case at all. Using mRNA programmed to produce luciferase protein, as well as mRNA tagged with a radioactive label, Pfizer showed that the majority of the mRNA initially remain near the injection site, but within hours become widely distributed within the body.[9] We have known for a long time that the spike protein is a pathogenic protein. It is a toxin. It can cause damage in our body if it gets into circulation. ~ Dr. Byram Bridle

The mRNA enters your bloodstream and accumulates in a variety of organs, primarily your spleen, bone marrow, liver, adrenal glands and, in women, the ovaries. The spike protein also travel to your heart, brain and lungs, where bleeding and or blood clots can occur as a result, and is expelled in breast milk.

This is a problem, because rather than instructing your muscle cells to produce the spike protein (the antigen that triggers antibody production), spike protein is actually being produced inside your blood vessel walls and various organs, where it can do a great deal of damage.

> *“It’s the first time ever scientists have been privy to seeing where these messenger RNA [mRNA] vaccines go after vaccination,”* Bridle told Pierson.[10]

> *“Is it a safe assumption that it stays in the shoulder muscle? The short answer is: absolutely not. It’s very disconcerting … We have known for a long time that the spike protein is a pathogenic protein.*

> *It is a toxin. It can cause damage in our body if it gets into circulation … The spike protein on its own is almost entirely responsible for the damage to the cardiovascular system, if it gets into circulation.”*

The Spike Protein Is the Problem

Indeed, for many months, we’ve known that the worst symptoms of severe COVID-19, blood clotting problems in particular, are caused by the spike protein of the virus. As such, it seemed really risky to instruct the body’s cells to produce the very thing that causes severe problems.

Bridle cites research showing that laboratory animals injected with purified spike protein from SARS-CoV-2 straight into their bloodstream developed cardiovascular problems and brain damage.

Assuming that the spike protein would not enter into the circulatory system was a “grave mistake,” according to Bridle, who calls the Japanese data “clear-cut evidence” that the vaccine, and the spike protein produced by it, enters your bloodstream and accumulates in vital organs. Bridle also cites recent research showing the spike protein remained in the bloodstream of humans for 29 days.

Once in your blood circulation, the spike protein binds to platelet receptors and the cells that line your blood vessels. As explained by Bridle, when that happens, one of several things can occur:

1. It can cause platelets to clump together — Platelets, aka thrombocytes, are specialized cells in your blood that stop bleeding. When there’s blood vessel damage, they clump together to form a blood clot. This is why we’ve been seeing clotting disorders associated with both COVID-19 and the vaccines
2. It can cause abnormal bleeding
3. In your heart, it can cause heart problems
4. In your brain, it can cause neurological damage

Importantly, people who have been vaccinated against COVID-19 absolutely should not donate blood, seeing how the vaccine and the spike protein are both transferred. In fragile patients receiving the blood, the damage could be lethal.

Breastfeeding women also need to know that both the vaccine and the spike protein are being expelled in breast milk, and this could be lethal for their babies. You are not transferring antibodies. You are transferring the vaccine itself, as well as the spike protein, which could result in bleeding and/or blood clots in your child. All of this also suggests that for individuals who are at low risk for COVID-19, children and teens in particular, the risks of these vaccines far outweigh the benefits.

The Spike Protein and Blood Clotting

In related news, Dr. Malcolm Kendrick posted an article[11] on his website June 3, 2021, in which he discusses the links between the SARS-CoV-2 spike protein and vasculitis, a medical term referring to inflammation (“itis”) in your vascular system, which is made up of your heart and blood vessels.

There are many different types of vasculitis, including Kawasaki’s disease, antiphospholipid syndrome, rheumatoid arthritis, scleroderma and Sjogren’s disease. According to Kendrick, all of them have two things in common:[12]

1.Your body for some reason starts to attack the lining of your blood vessels, thereby causing damage and inflammation — The “why” can differ from one case to another, but in all cases, your immune system identifies something foreign in the lining of the blood vessel, causing it to attack. The attack causes damage to the lining, which results in inflammation.

Blood clots are a common result, and can occur either because the platelets clump together in response to the vessel wall damage, or because your anticlotting mechanism has been compromised. Your most powerful anticlotting system is your glycocalyx, the protective layer of glycoproteins that lines your blood vessels.

Among many other things, the glycocalyx contains a wide variety of anticoagulant factors, including tissue factor inhibitor, protein C, nitric oxide and antithrombin. It also modulates the adhesion of platelets to the endothelium. When blood clots completely block a blood vessel, you end up with a stroke or a heart attack.

A reduction in platelet count, known as thrombocytopenia, is a reliable sign that blood clots are forming in your system, as the platelets are being used up in the process. Thrombocytopenia is a commonly-reported side effect of COVID-19 vaccines, as are blood clots, strokes and lethal heart attacks — all of which are pointing toward spike proteins causing vascular damage.

2.They significantly increase your risk of death, in some cases raising mortality by 50 times compared to people who do not have these conditions.

The take-home message Kendrick delivers is that “If you damage the lining of blood vessel walls, blood clots are far more likely to form. Very often, the damage is caused by the immune system going on the attack, damaging blood vessel walls, and removing several of the anti-clotting mechanisms.” The end result can be lethal, and this chain of events is exactly what these COVID-19 vaccines are setting into motion.

SARS-CoV-2 Spike Protein May Damage Mitochondrial Function

Other research suggests the SARS-CoV-2 spike protein can have a serious impact on your mitochondrial function, which is imperative for good health, innate immunity and disease prevention of all kinds.

When the spike protein interacts with the ACE2 receptor, it can disrupt mitochondrial signaling, thereby inducing the production of reactive oxygen species and oxidative stress. If the damage is serious enough, uncontrolled cell death can occur, which in turn leaks mitochondrial DNA (mtDNA) into your bloodstream.[13]

Aside from being detected in cases involving acute tissue injury, heart attack and sepsis, freely circulating mtDNA has also been shown to contribute to a number of chronic diseases, including systemic inflammatory response syndrome or SIRS, heart disease, liver failure, HIV infection, rheumatoid arthritis and certain cancers.[14] As explained in “COVID-19: A Mitochondrial Perspective”:[15]

> *“Apart from its role in energy production, mitochondria are crucial for … innate immunity, reactive oxygen species (ROS) generation, and apoptosis; all of these are important in COVID-19 pathogenesis. Dysfunctional mitochondria predispose to oxidative stress and loss of cellular function and vitality. In addition, mitochondrial damage leads to … inappropriate and persistent inflammation.*

> *SARS coronavirus 2 (SARS-CoV-2) … enters cell by attaching to angiotensin converting enzyme 2 (ACE2) receptors on cell surface … Following infection, there is internalization and downregulation of ACE2 receptors.*

> *At vascular endothelium, ACE2 performs conversion of angiotensin II to angiotensin (1–7). Thus, a low ACE2 activity subsequent to SARS-CoV-2 infection leads to imbalance in renin-angiotensin system with relative excess of angiotensin II.*

> *Angiotensin II through binding to its type 1 receptors exerts pro-inflammatory, vasoconstrictive, and prothrombotic effects, while angiotensin (1–7) has opposing effects … In addition, angiotensin II increases cytoplasmic and mitochondrial ROS generation leading to oxidative stress.*

> *Increased oxidative stress may lead to endothelial dysfunction and aggravate systemic and local inflammation, thus contributing to acute lung injury, cytokine storm, and thrombosis seen in severe COVID-19 illness …*

> *A recent algorithm showed that majority of SARS-CoV-2 genomic and structural RNAs are targeted for mitochondrial matrix. Thus it appears that SARS-CoV-2 hijacks mitochondrial machinery for its own benefit, including DMV biogenesis. Manipulation of mitochondria by virus may lead to mitochondrial dysfunction and increased oxidative stress ultimately leading to loss of mitochondrial integrity and cell death …*

> *Mitochondrial fission enables removal of the damaged portion of a mitochondrion to be cleared by mitophagy (a special form of autophagy). Metabolomic studies suggest that SARS-CoV-2 inhibits mitophagy. Thus, there is accumulation of damaged and dysfunctional mitochondria. This not only leads to impaired MAVS [mitochondrial antiviral signaling] response but also aggravates inflammation and cell death.”*

The author, Pankaj Prasun, points out that the virus’ impact on mitochondria helps explain why COVID-19 is so much deadlier for older people, the obese, and those with diabetes, high blood pressure and heart disease.

All of these risk factors have something in common: They’re all associated with mitochondrial dysfunction. If your mitochondria are already dysfunctional, the SARS-CoV-2 virus can more easily knock out more mitochondria, resulting in severe illness and death.

The Spike Protein Is a Bioweapon

In my interview with Seneff and Mikovits (see earlier hyperlink), they both stressed that the key danger — both in COVID-19 and with the vaccines — is the spike protein itself. However, while the spike protein found in the virus is bad, the spike protein your body produces in response to the vaccine is far worse. Why?

Because the synthetic mRNA in the vaccine has been programmed to instruct your cells to produce an unnatural, genetically engineered spike protein. Specific alterations make it far more toxic than that found on the virus itself. Mikovits goes so far as to call the spike protein a bioweapon, as it is a disease-causing agent that demolishes innate immunity and exhausts your natural killer (NK) cells’ ability to determine which cells are infected and which aren’t.

In short, when you get the COVID-19 vaccine, you are being injected with an agent that instructs your body to produce the bioweapon in its own cells. This is about as diabolical as it gets.

In her paper, “Worse Than The Disease: Reviewing Some Possible Unintended Consequences of mRNA Vaccines Against COVID-19,” published in the International Journal of Vaccine Theory, Practice and Research in collaboration with Dr. Greg Nigh,[16] Seneff explains why the unnatural spike protein is so problematic.

In summary, normally, the spike protein on a virus will collapse on itself and fall into the cell once it attaches to the ACE2 receptor. The vaccine-induced spike protein does not do this. Instead it stays open and remains attached to the ACE2 receptor, thereby disabling it and causing a host of problems that lead to heart, lung and immune impairment.

What’s more, because the RNA code has been enriched with extra guanines (Gs) and cytosines (Cs), and configured as if it’s a human messenger RNA molecule ready to make protein by adding a polyA tail, the spike protein’s RNA sequence in the vaccine looks as if it is part bacteria,[17] part human[18] and part viral at the same time.

There’s also evidence suggesting the SARS-CoV-2 spike protein may be a prion, which is yet another piece of really bad news, particularly as it pertains to vaccine-induced spike protein. Prions are membrane proteins and when they misfold, they form crystals in the cytoplasm resulting in prion disease.

Since the mRNA in the vaccines has been modified to spew out very high amounts of spike protein (far greater than that of the actual virus), the risk of excessive buildup in the cytoplasm is high. And, since the spike protein doesn’t enter into the membrane of the cell, there’s a high risk that it can become problematic if indeed it works like a prion.

Remember, the research cited by Bridle at the beginning of this article found the spike protein accumulates in the spleen, among other places. Parkinson’s disease is a prion disease that has been traced back to prions originating in the spleen, that then travel up to the brain via the vagus nerve. In the same way, it’s quite possible COVID-19 vaccines may promote Parkinson’s and other human prion diseases such as Alzheimer’s.

What Are the Solutions?

While all of this is highly problematic, there is help. As noted by Mikovits, remedies to the maladies that might develop post-vaccination include:

Hydroxychloroquine and ivermectin treatments. Ivermectin appears particularly promising as it actually binds to the spike protein. Please listen to the interview that Brett Weinstein did with Dr. Pierre Kory,[19] one of Dr. Paul Marik’s collaborators
Low-dose antiretroviral therapy to reeducate your immune system
Low-dose interferons such as Paximune, developed by interferon researcher Dr. Joe Cummins, to stimulate your immune system
Peptide T (an HIV entry inhibitor derived from the HIV envelope protein gp120; it blocks binding and infection of viruses that use the CCR5 receptor to infect cells)
Cannabis, to strengthen Type I interferon pathways
Dimethylglycine or betaine (trimethylglycine) to enhance methylation, thereby suppressing latent viruses
Silymarin or milk thistle to help cleanse your liver

From my perspective, I believe the best thing you can do is to build your innate immune system. To do that, you need to become metabolically flexible and optimize your diet. You’ll also want to make sure your vitamin D level is optimized to between 60 ng/mL and 80 ng/mL (100 nmol/L to 150 nmol/L), ideally through sensible sun exposure. Sunlight also has other benefits besides making vitamin D.

Use time-restricted eating and eat all your meals for the day within a six- to eight-hour window. Avoid all vegetable oils and processed foods. Focus on certified-organic foods to minimize your glyphosate exposure, and include plenty of sulfur-rich foods to keep your mitochondria and lysosomes healthy. Both are important for the clearing of cellular debris, including these spike proteins. You can also boost your sulfate by taking Epsom salt baths.

To combat the toxicity of the spike protein, you’ll want to optimize autophagy, which may help digest and remove the spike proteins. Time-restricted eating will upregulate autophagy, while sauna therapy, which upregulates heat shock proteins, will help refold misfolded proteins and also tag damaged proteins and target them for removal. It is important that your sauna is hot enough (around 170 degrees Fahrenheit) and does not have high magnetic or electric fields.

The National Vaccine Information Center (NVIC) recently posted more than 50 video presentations from the pay-for-view Fifth International Public Conference on Vaccination held online October 16 to 18, 2020, and made them available to everyone for free.

The conference’s theme was “Protecting Health and Autonomy in the 21st Century” and it featured physicians, scientists and other health professionals, human rights activists, faith community leaders, constitutional and civil rights attorneys, authors and parents of vaccine injured children talking about vaccine science, policy, law and ethics and infectious diseases, including coronavirus and COVID-19 vaccines.

In December 2020, a U.K. company published false and misleading information about NVIC and its conference, which prompted NVIC to open up the whole conference for free viewing. The conference has everything you need to educate yourself and protect your personal freedoms and liberties with respect to your health.

Don’t miss out on this incredible opportunity. I was a speaker at this empowering conference and urge you to watch these video presentations before they’re censored and taken away by the technocratic elite.

SUPPLEMENT GUIDE

PINE NEEDLE TEA

SURAMIN - ACTIVE EXTRACT

ABOUT

Sipping pine needle tea could give your immune system a much-needed boost. Back in the day, sailors used to drink pine needle tea to protect from scurvy. Pine needles are bursting with vitamin C, with 4 to 5 times more per serving than a glass of orange juice!

BENEFITS

Suramin is used to treat African sleeping sickness and river blindness. Also used for autism and is noted to help the body through post-medical procedures, both complex surgeries and simple ones. Suramin is believed to be particularly helpful for blood clots. Historically, Native Americans used pine needle tea as an expectorant and decongestant – to expel mucus and phlegm, thus eliminating bacteria and other pathogens in the lungs. Traditionally, pine needles have been used as a way to soothe arthritic joints by relieving pain.

PROPERTIES

- AntiOxidant
- AntiViral
- AntiParasitic
- AntiCoagulant
- Mood Stabiliser
- Weight Management
- AntiInflammatory
- Analgesic
- Clears Sinuses
- Expectorant

ZEOLITE

CLINOPTILOLITE - COMMONEST TYPE

ABOUT

Zeolite is a complex mineral which forms in the contact of volcanic lava and water. Zeolite is a 100% natural volcanic mineral compound that contains more than 60 trace minerals and 12 amino acids.

BENEFITS

Tiny cages enable zeolite to act as a "molecular sieve," filtering molecules based on their particle size. Negative surface charge loosely binds minerals – such as sodium, potassium, and calcium – and replaces them with large ions and heavy metals . In other words, zeolite can pick up plenty of "bad stuff" like viruses, environmental toxins, pesticides, free radicals, heavy metals (cadmium, mercury, lead and arsenic)and replace it with "good stuff". The body doesn't absorb Zeolite, so it passes through and out of your system in 5 to 7 hours - it takes the trash along with it. Studies also suggest that zeolite helps treat HSV, Hepatitis C, colds and flu. It removes free radicals, helps maintain an alkaline pH between 7.35 and 7.45, which promotes healthy brain and immune function. Zeolite improves skin quality and fights the visible signs of ageing.

PROPERTIES

- AntiOxidant
- AntiCoagulant
- AntiFungal
- ProBiotic
- Heavy metal detox
- Mood Stabiliser
- Hangover reduction
- Anti depressant
- AntiInflammatory
- Skin Health
- Oral Hygiene
- Liver Detox

TURMERIC

CURCUMIN - ACTIVE EXTRACT

ABOUT

There are over 10 000 peer reviewed published articles that prove the benefits of turmeric - especially curcumin. Turmeric is arguablly the most powerful herb on the planet at fighting and possible reversing disease.

BENEFITS

Ayurveda and Traditional Chinese Medicine Practitioners have been prescribing turmeric and its extracts as part of holistic protocols for thousands of years. Studies show the use of turmeric greatly reduces instances of platelet aggregation and potentially reduces the risk of blood clots . Arguably, the most powerful aspect of curcumin is its ability to control inflammation as it contains several anti-inflammatory compounds. It has been used successfully for the treatment of arthritis, diabetes, scabies, acne scarring, IBS, high cholesterol, obesity, liver detox and is now being researched for pancreatic and prostate cancer.

PROPERTIES

- AntiCoagulant
- AntiInflammatory
- Analgesic
- AntiDepressant
- Skin Health
- AntiScarring
- AntiDiabetic
- AntiParasitic
- AntiBacterial
- AntiFungal
- Cardio protective
- Good gut health

NIGELLA SATIVA

BLACK SEED/KALONJI

ABOUT

Nigella Sativa seeds have been used for over 2000 years for their aroma and flavor in cuisines as well as their reported health benefit properties. In fact, archaeologists found black seeds in King Tut's tomb and the Prophet Muhammad once touted black seed oil extract as a "cure for every disease except death."

BENEFITS

As more and more studies start so surface, it becomes quite apparent that this ancient seed from the Nigella sativa plant may have a profound impact on your health and wellbeing. Through the support of cognitive function, liver health, digestive health, and metabolic function; it is definitely making a case for quite a strong supplement for overall health. Research shows that antioxidants can have a powerful effect on health and disease.

In fact, some studies indicate that antioxidants may protect against several types of chronic conditions, including cancer, diabetes, heart disease and obesity. Anecdotal research alone shows many users of Nigella Sativa reporting feelings of elevated mood, sleep support, less brain fog, feeling more present, healthy stress levels, and supporting cognitive performance.

PROPERTIES

- Immune Booster
- AntiOxidant
- AntiInflammatory
- AntiBacterial
- Lowers Cholesterol
- Stabilises Blood Sugar
- AntiHypertensive
- Cardio-Protective
- Analgesic
- Supports Gut Health
- Improves Memory
- AntiStress

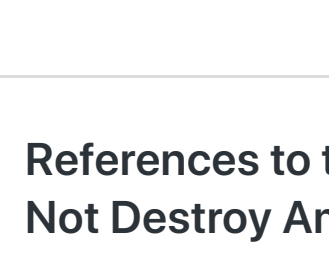
References to the article 'Damn You To Hell, You Will Not Destroy America – The Spartacus COVID Letter'



Here you can find the references mentioned in the article 'Damn You To Hell, You Will Not Destroy America – The Spartacus COVID Letter'. I decided to publish them here. It's hard to write such detailed and excellent document (written by an anonymous person) without references. The article referred to a PDF file, which contains the article again and the references. Because there are so many references, Whoever the anonymous person is, he has researched his article here very well. I also get the impression that the anonymous person is a scientist, because his research covers much more than what the article tells us. This document is a strove of information for anyone, who wants to have additional information or references about everything what has to do with COVID-19 and more.

Wim's Blog 5

This is a master document about loads of references to COVID-19 related issues, like the virus itself, vaccines, etc. Also this problem has been addressed in many scientific publications.

Stop spreading nonsense conspiracy information to scare people.
POP up ad says 818,000 adverse advents is not safe and effective, well that's not a lot of information to go by, if you look at the hospitalization and death rates in vaccinated vs unvaxxed you'll see it is VERY effective. IF you consider most of those adverse reactions are minor things, and that Just under HALF the whole world population has been vaccinated with over 6.8 BILLION doses. Doesn't seem that bad compared to the long lasting effects from Covid.

You should be the one to stop with your utter nonsense and willful ignorance. My surgeon took the vax and fell sick for a month from it. My neighbor took it and within a month it destroyed his lungs and was ill for a long time. Now he is permanently on oxygen. My technical school classmate took it and died soon after. My photographer and her husband took it and her husband was dead from it within two weeks and she was still suffering after effects of it more than a month later as she took our family portraits. My relative on my wife's side took it and died within days. My aunt and uncle took it and now he has been ill every since with a cough that will not go away no matter how they try to treat him and his wife (my aunt) developed the same cough and was rushed to the hospital two days ago and now has a diagnosis of ovarian cancer and liver damage. She spent her whole life working for the hospital. She just had her yearly full examination complete with blood work and was given a perfect bill of health right before she took the poison shot. Now she is laying there dying. This is not to mention Marvin Hagler and all the other celebs and sports players who either died or fell deathly ill with complications after that.
You and people like you are the problem. I think the politicians and labs that are behind this should be tried and convicted of murder and morons like you should be tried and convicted of accessories to murder. You are nothing more than a willful accomplice spreading propaganda. I am living it, seeing it, burying loved ones and watching the pain and suffering…. and you have the nerve to come on here and belittle their loss and suffering as though its nothing. Its people like you hat deserve these things to happen to you and not them… Low life dirt bag.

Bem…. the FULLY VACCINATED are producing the variants (it is impossible for the unvaccinated to create variants)….. the vaccine is totally ineffective against anything other than the original covid virus which is now EXTINCT. The death rate for the virus was never more than 0.02% and survival was 99.98%… THIS WAS NEVER A PANDEMIC…. HOSPITALS WERE NEVER OVERWHELMED….. HEALTH CARE WORKERS WERE BEING LAID OFF IN THE MIDDLE OF THE PRETEND PANDEMIC BECAUSE THERE WERE NO ELECTIVE PROCEDURES BEING SCHEDULED…. PEOPLE WITH CANCERS HAD TO CANCEL THEIR CHEMO THERAPIES AND DIED MUSH EARLIER THAN THEY SHOULD HAVE. BEM… YOU HAVE PROVED TO BE DUMBER THAN A PINEAPPLE IN A WHEAT FIELD. THIS IS A WORLD WIDE DEPOPULATION PLAN MADE BY THE GLOBALISTS WHO MEET IN DAVOS SWITZERLAND EVERY JANUARY. DO YOURSELF A FAVOR AND EDUCATE YOURSELF. BETTER YET… STAY DUMB…. THEN YOU WON'T REALIZE YOU DON'T HAVE MUCH LONGER TO LIVE.

Len October 29, 2021 at 12:08 am

The Covid jabs have killed more people than all other vaccines COMBINED. You have to be brain dead or very stupid to think this is nonsense conspiracy. More than 99.6% survival rate if you get Covid. The jab (it is not a vaccine), provides zero immunity from getting or transmitting the virus. Over 70% in the UK hospitalised with a serious covid illness are from FULLY "vaccinated" people. Absolutely no way this can be referred to as a "vaccine". India and other countries have proven that Ivermectin works safely and effectively to combat this virus. This jab proves itself to be unsafe and ineffective, despite what any government and big pharma lackey is saying. They are in this together raking in huge money.

Hi Ben,

Take a honest look at this and seek the truth of the questions asked and review documentaries from Dr and Scientists not on government or Big Pharma payroll-

Not at all IL numbers show 51% vaxd dead in recent weeks. Not everyone gets long covid, I know at least a dozen people had covid and are just fine.

Like

Janet Nattress, BA November 8, 2021 at 6:45 am

Bem, I am the unvaccinated and I object to you calling the newly vaccinated "unvaccinated". If ever there was a misdirect, that is one! Those deaths and hospitalizations are fires and smoke caused by the arsonist COVID vaccines, no doubt about it. There is no 2 week grace before it hits.

Liked by 1 person

Anonymous November 8, 2021 at 8:47 am

Death rate from vaccine when compared against total adverse events, where adverse = covid infection, is nearly 2%. Don't know about you buddy, but that's more risk than covid, statistically speaking.

Louise November 9, 2021 at 3:21 pm

Bem, u r deluded and un-evolved if u believe government's have yr back…..u seem to presume erroneously that governments are beyond corruption which is why I call u deluded. When my now deceased husband was conscripted in Australia in 1969 to fight in a corrupt US Vietnam war, the government said he could "safely drink Agent Orange without harm"…..sound like a familiar lie?? He died from it! Wake up if u naively believe the mainstream complicit media figures on Covid are actually true. Get your head out of the fake media controlled search engines & fact checkers, and seek what is "really" happening……

What long lasting effect? immunity? lol that's a positive thing your body does naturally. Experimental gene therapy with a graphene topper that will likely kill you within 2 years and has killed so many already.. if you can't see by now its a hoax for a very sinister agenda.. may God help you.. and i seriously hope you wake up soon, for humanities sake.

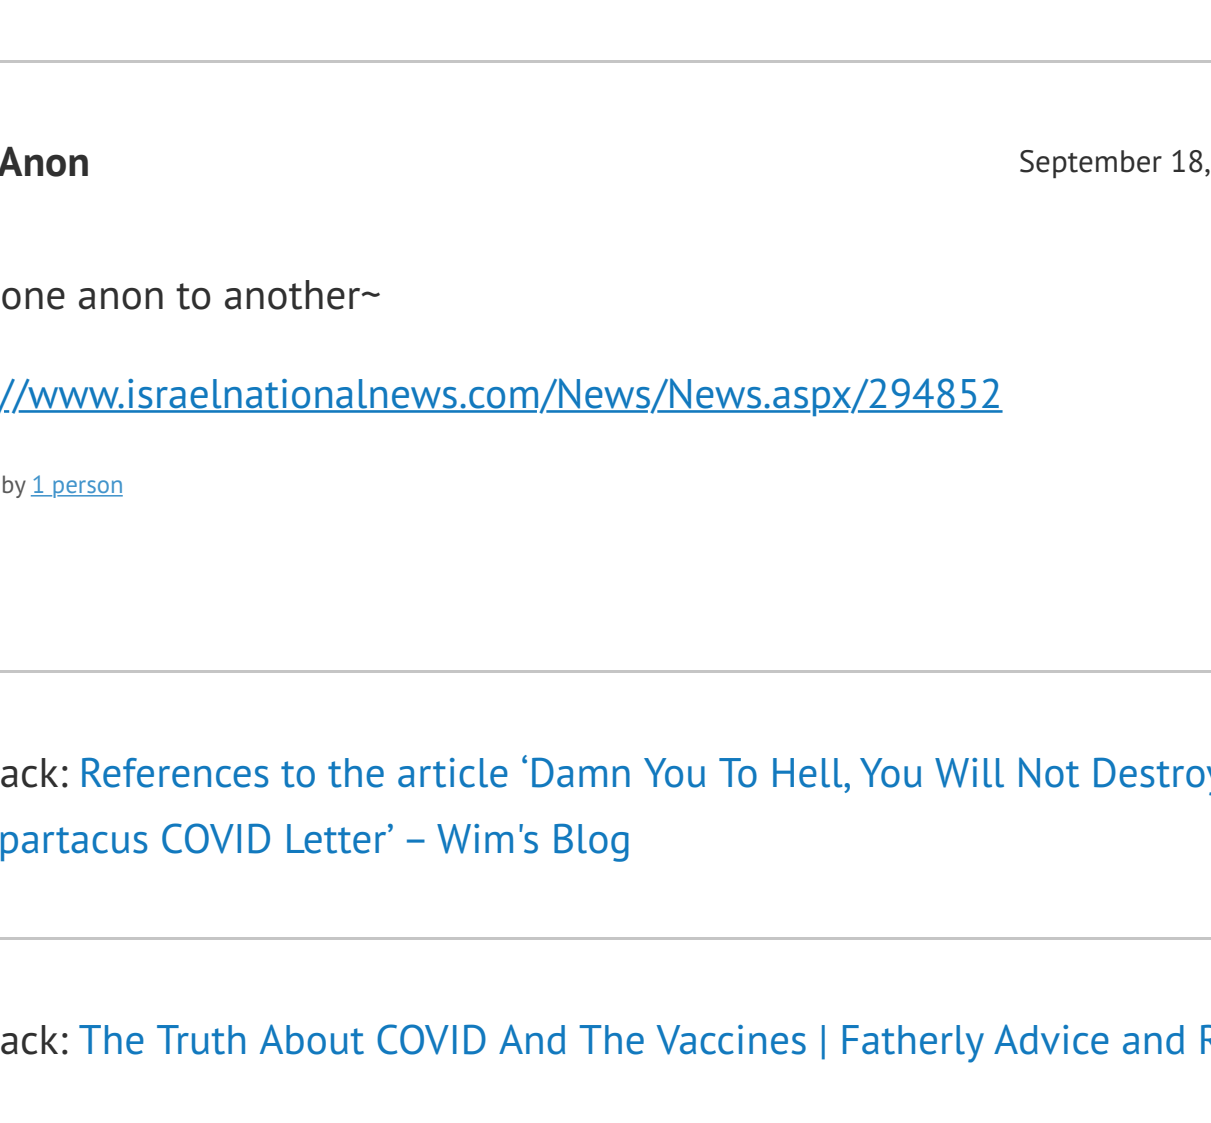
This post from channel 7 Detroit has over 255 thousand comments in just two weeks time. The post asked for people who has lost family and friends to the covid virus to contact them with their story. Yes people are telling their stories but they are telling how they have lost family and friends to the covid vaccine instead. I knew there were side effects but this is off the charts



WXYZ-TV Channel 7
about 2 months ago

After the vaccines were available to everyone, did you lose an unvaccinated loved one to COVID-19? If you're willing to share your family's story, please DM us your contact information. We may reach out for a story we're working on.

Gregory Cruz Abbot September 30, 2021 at 11:32 am

HCQ and Ivermectin are listed as viable options. This along with your numerous claims which come in the form of anecdotal quotes (minus data). These claims are at best dubious and at worst ought right lies. Equally unimpressive is the Spartacus letter which as per usual is unattributed just like 99 percent of all claims from the far right. You are able to make idiotic claims due to the fact that the base will believe anything they are told as long as it fits with the current Dogma. I truly hope every one of you is held to account for this. In this life or the next.

Keep it up. Dr Goebbels would be proud

I don't know what you are referring too. But the label far right as used against anyone who argues against these destructive covid policys in itself is a ploy Goebels would be proud of. Lies about covid are coming thick and fast from the left side of politics too. So Goebels would be proud in fact humbled by the left as well. This entire episode has been full of politics and lies on both sides. But the left have the main stream media and jokes like Rachel madow to pumpnfear 24.7.

You are right, anytime they disagree with you either you get labeled far right, white supremes, racist or any other such name just to shut us up. I know there are lies on both sides but the main stream media is the worst. I have hidden video of CNN and the stuff they say is sickening. They admitted to spewing propaganda and much more.

Wayland Brooks October 1, 2021 at 8:56 pm

Maybe you should listen to Dr. Robert Malone, who invented the technology to produce the mRNA vaccine. He is a scientist, not a politician. Dr. Malone essentially states there are too many unanswered questions about this vaccine to declare it safe for everyone.

Samara Sevilla October 4, 2021 at 10:49 am

Entirely more likely goebbels would applaud the synthetic mRNA transfection that is genotoxic. Your opposition is religious, as you cannot accept sound medical data. But, continue to comply and allow the government and politicians to make your medical decisions. I'm sure they want what's best for you.

Are you joking? Hard to tell

Like

Jeff October 6, 2021 at 9:08 pm

Are you serious? You are so naive. What do you think they did in India? They gave the IVERMECTIN and Covid deaths dwindled to nothing. There are 10s of 1000's of doctors who have been using Ivermectin for years and have been treating their Covid patients early and been very successful. All of the "clinical tests" of HCQ and IV were given LATE after infection and in ridiculous dosages so OF COURSE it wasn't effective. But you'll never look at that data b/c it doesn't fit your perspective. Mr. Abbott, doesn't it strike you as odd that science has always been able to be challenged but in this case for the last 18 months it's been all about censoring and shutting up the dissenting voices. And believe me there are voices of doctors researchers and virologists all over this globe that are saying this jab is wrong on every level. . If you can't see behind this to the power, control, greed and corruption then you are sadly blinded.

Julie Yvoda November 2, 2021 at 6:33 am

How can a person tell the difference between those who are "completely blind" or those who are "fully aware" it is a kill shot? I can't shake this feeling that it is more so the "fully aware" who post demeaning comments in their " fact check" kind of way. A willingness to debate should be present. I've noticed that comments are usually open in articles or podcasts discussing deadly vaccine side effects but comments are turned off when the vaccines are encouraged. I'm pretty sure it's because they have nothing but profiting liars and criminals in their corner, who would lose hands down against the thousands of scientists, doctors, and researchers who have lost their careers, salaries, reputations, families and homes because their conscience wouldn't let them partake in mass murder.

Donavon K Sheldon October 25, 2021 at 11:12 am

There are two sides to the Vaccine and Covid question. On side is people making money from it and the other are the doctors that just want to treat their patients and people that work with data. I suggest you Google Dr Robert W Malone MD and Dr Ryan Cole Dr Pierre Kory and read what the have to say, I'm pretty sure they aren't making muny from vaccines.

well i live in Melbourne Australia, if i did not get my first jab by14 oct 2021 i can no longer go to work by a state ordered mandate. so in now I'm at home with no job, on extended leave, this mandate hopefully will end in December'
however there is a class action happening brought by G&B lawyers in Victoria's high court and federal high court and other states. please donate to go fund fund me web site to stop Victoria's madness, because this is coming to a state near you. G&B class action say no to mandatory vaccination.

To all of those being told they cannot work if they don't get "vaccinated" … hang in there. These criminals must be taken to task, never forgotten and destroyed. Don't give in (easy for me to say because I am thus far unaffected by this Australian draconian and authoritarian BS), your moral fortitude will one day repay you properly and the people will win. There are more people than these government goons.

Don't care November 9, 2021 at 7:06 pm

Sorry to hear you lost your job but do you really need a "gofundme" page? If your so right and the lawyers are ready to fight shouldn't they be doing it free anyways? If it's all correct info and since lawyers make so much money already. Your case should be free.
Now if you wanna discuss rights whether it's government or not if I were to run a company and you don't like the way it's run go elsewhere. You have rights……..I have rights.
Let's just leave it at anarchy!! Everyone for themselves. Freedom isn't free…..or is it? Let's go back to the times of Polio and measles with some small pox. Pay your own way if your so perfect and right about this.

You sound like the church.

Can you please advise on a loved one, a young mom of 3 young children, who got her first Pfizer dose around 5-7 weeks ago and is having weakness in extremities and heart pain that woke her up, and heart pain, extreme tiredness and weakness. What testing should she have done to find out extent of damage and where to go from there?
Thanks so much!

Kathy, She needs to go in right away and have an EKG done, an echocardiogram, blood work to check for heart damage. She needs to be checked for thrombosis. Possibly a D-dimer test can still check for clots, not sure if it's too late to do that. She needs to do this immediately if she hasn't done so already.

The article has some footnote call out reference 1,2,4,5 (in elevated characters, superscript). raised letters in the beginning text. But there are not associated articles listed near the bottom of the article. Why is this?
Quoting s a reference that is not subsequently listed seems dis-ingenious or possibly obfuscation.

Where are and what re these references?

The links were with the original article. However, I think this was pasted in here and those references didn't make the transfer. Mercola only leaves his posts up on his page for 48 hours. He has all references live linked so one can download or bookmark them and one can download his article as well within that time if desired. After the 48 hour window, it is taken down.

I would like to know more about the non mRna vaccines like Novavax. Is the spike protein delivered in protein based vaccines still toxic, can it cause the same harm as the mRNAs? Novavax is claiming 100% effective against disease.
